

# Introducing the MOTOROLA CP100 Two-way Radio

MOTOROLA introduces a new two-watt radio that provides outstanding on-site radio performance and includes the following features.

## Major Features include:

- **Attention Getting Call Tones** – “ringing” gets the attention of radio users even in high noise areas!
- **New Style Swivel Belt Holster** – Out of the way when you don’t need it and readily available when you do.
- **Also runs on 4 AA Batteries for Emergency Situations** – No time to recharge the battery or a need for longer battery life, NO PROBLEM.
- **Lighter Weight Radio** – Lighter is always nice
- **Voice Scrambling for Added Security** – prefer that other radio users not hear your conversation? This no charge feature allows you that option.
- **Built in durability** – Radios built to Mil Spec 810 C, D, E, F with IP54 weatherproofing

## Nice to have features include:

- Large Easy to Read Backlit Display
- Battery Meter – Lets you know the status of your battery
- Radio Signal Strength Indicator
- Radio Programming Cloning Capability
- Available in 1 Channel or 15 Channel Models
- Programming Lock - Prevents Accidental Reprogramming

“Finally, an affordable on-site communications radio without sacrificing durability or the important features that I need.”  
Bill Collins Events Coordinator
